IVIG PowerPlan Workflow

PRESCRIBER

- Open chart to your Service's most recent Encounter
- Add Intravenous Immunoglobulin (IVIG) PowerPlan
- Initiate 1st phase
 - Select one of the Weight for Calc orders
 - · Enter When Needed date
- Click 2nd phase Do NOT Initiate this phase
 - Check off planned orders
 - Respond to any Alerts that fire
 - Right-click on Diet & Lab orders, Modify Planned Order and provide any missing required details
- · Sign the PowerPlan
- Copy the Plan as needed to put in multiple Plans at one time
 - Nurses will always use the TOP plan first. So, any special instructions for the next visit must be in that Plan

NURSE

- Check When Needed phase to verify correct plan
- Review 2nd phase orders this is your Nurse Review process
- Initiate 2nd phase

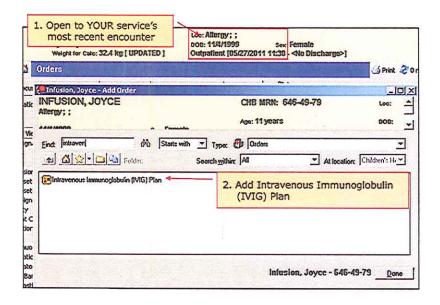

PAGE the service On-Call if ANY problems arise when Initiating 2nd phase or alerts fire that have not been dealt with by ordering Prescriber

- · Print lab labels as needed
- Administer meds as needed

PHARMACY

 Once orders are initiated and in Med Manager, pharmacy verifies, makes, and dispenses meds making premeds along with everything else

Prescriber – open chart to most recent encounter for your Service

First Phase - When Plan Needed

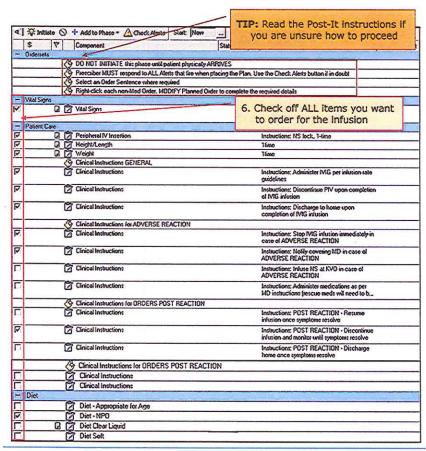

NOTE: If you select the *Update Weight for Calc* order, a form opens where you can record an appropriate weight to use for dosing decisions

When you are done Planning the orders and filling in all the needed details, sign the Plan

NOTE: Signing the Plan will cause Allergy, Dose Range and Sound alike/Look alike Alerts to fire. It is critical that you deal with all Alerts at this time. More about Alerts on next pages

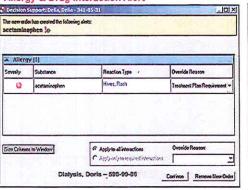

Second Phase - ALERTS

NOTE: Signing the Plan causes Allergy, Sound alike/Look alike and Dose Range Alerts to fire. It is critical that you deal with all Alerts at this time.

The nurse will:

- use your Override Reason for the Allergy Alert and Dose Range Alert when the alerts fire again when the patient arrives and the nurse initiates the 2nd phase of the Plan
- page you with questions about the Sound alike/Look alike Alert

Allergy & Drug Interaction Alert

JobAid

Copying a Plan - Planning for additional visits

Once you have finished putting the Plan in place, you have the option to make an exact copy of it for another future visit

Locate the Plan you want to copy and...

- Right-click on the Plan (NOT the phase)
- Select Copy

The Plan is copied and appears at the TOP of the Plans list

NOTE: all order details have been copied

- 3. Initiate the 1st Phase
- 4. Confirm and/or modify all orders in both phases as needed
- s. Finish placing the Plan as usual responding to all Alerts
